

I couldn't install MSSQL for my ubuntu linux Distro its 22.10. This version is not supported for MSSQL right now its under development.

TASK #1: Northwind Database Installed on MySQL.

```
mysql> select database();
+-----+
| database() |
+-----+
| Northwind  |
+-----+
1 row in set (0.00 sec)

mysql> show tables;
+-----+
| Tables_in_Northwind |
+-----+
| Category              |
| CustCustDemographics  |
| Customer              |
| CustomerDemographics  |
| Employee              |
| EmployeeTerritory     |
| OrderDetail           |
| Product               |
| Region                |
| SalesOrder            |
| Shipper               |
| Supplier              |
| Territory             |
+-----+
13 rows in set (0.00 sec)

mysql> 
```
